

**STRICOM**  
*Simulation, Training & Instrumentation Command*

# *Enterprise CITTIS*

**STRICOM's Path To Integrated Digital Environment**

*Virtual Enterprise and  
The Electronic Commerce Marketplace*

## *STRATEGY*

- Applies to all relevant data required by joint IPT's, not limited to just technical/product data.
- Transmitted by various methods, e.g. Electronic Data Interchange or via another application.
- Hardware/software/application independent
- Leverage current technologies: Internet
- Ensure data is accessible via standard access & standard security control.
- Data location is irrelevant ( Industry or Govt..)
- Technology refreshment through command investment

## *CURRENT STATUS OF ECITIS*

- ECITIS Functional Requirements Defined & Documented
- Beginning Prototype using JCALS:
  - Workflow module
  - Electronic library
  - Security
- Command tasked to transition programs currently using STRICOM/LMIS dedicated line:
